**Reception 1800hr for dinner at 1900hr** Lumley Castle, Ropery Lane, Chester-Le-Street, DH3 4NX

**Talk: 'The Journey in Gynaecological Oncology: lessons learnt from the masters'**

**Prof Neville Hacker & Prof John Monaghan**

**Sponsors:**

***From the Organisers' desk....***

***We welcome you all to the North-East of England for a very special event. As our MCh (master's course) in Gynaecological Oncology and a research laboratory at James Cook University Hospital kicks off to a voyage with an 'endeavour' to support our academic clinical fellows and researchers in the region, we couldn't have expected a better beginning than taking lessons from some of the great masters in our field.***

***Prof Nicola Curtin, (pioneer in the field of DNA repair and PARP inhibitors) Newcastle University, UK will describe her experience over the years in supporting several clinical research fellows in the region and projects in Gynaecological Oncology which have made significant impact globally.***

***We look forward to sharing our thoughts, research ideas, resources, and expertise in continuing regional collaboration between our two Gyn oncology centers- Gateshead and James Cook (and units), Universities and Medical schools (Newcastle, Teesside, York) and most importantly, between clinicians, academics, and young investigators- regionally, nationally, and internationally.***

***We are truly honoured to have our legendary surgical mentors with us.***

***Prof Neville Hacker, Prof John Monaghan and Prof William Helm will share their wisdom and philosophy in taking us through the evolution, techniques, and rationale for surgical procedures in Gynaecological Oncology.***

***We look forward to hosting our IGCS global curriculum trainees at the James Cook University Hospital (international mentor site) and greatly appreciate the efforts from several of our regional/UK colleagues in this mentoring program. We invite our international fellows to join us virtually on the day (link will be shared). We are grateful to two of the members of the very first IGCS council (Prof Hacker and Prof Monaghan) for sharing their presentations with us.***

**First Council of the International Gynecologic Cancer Society in Amsterdam 1987**

**From left to right: Denny De Petrillo, Martine George, Sergio Pecorelli, Neville Hacker, Nina Einhorn, Alon Dembo, Paul Morrow, John Monaghan, and Peter Heintz.**
