

Workshop Structure (Proposed Schedule)

Program	Expanded Training Short Course - IGCS Train-the-Trainer Master Workshop	
	For an extensive practical experience, this track offers the opportunity to perform surgical procedures on cadavers, simulating real-life operations with close mentorship from expert surgeons. Each cadaver is assigned to three participants.	
08:30	Welcome and access (laparotomy or laparoscopy)	
	Retroperitoneal Space Identification <ul style="list-style-type: none"> Dissection & anatomic relationship (Left side) 	
	<ul style="list-style-type: none"> Special focus on ureter & neural anatomy (Left side) 	
	Laparoscopic Pelvic Lymphadenectomy (Right side) <ul style="list-style-type: none"> Step-by-step, Tips & tricks 	
	Type B radical hysterectomy (Left side)	
	Type B radical hysterectomy (Right side)	
	Lateral Extended Pelvic Resections: Internal vascular system and sacral roots (right side)	
	Lateral Extended Pelvic Resections: Pelvic musculature (left side)	
	Ureteral Complication - repair	
	Ureteral reimplantation	
	Pelvic vascular complications: Laparoscopic Management	
	Distillation	
	Lunch	
	Para-aortic Lymphadenectomy	
	Retroperitoneal vascular complications	
	Upper abdominal exploration and Liver mobilization	
	Right diaphragmatic peritonectomy	

	Retro-hepatic peritoneal resection (Morrison, fossa for ductus venosum).	
	Supra-hepatic vein lesion and repair	
	Splenectomy	
	Conservative bowel resections (Schaving and discoid)	
	Rectosigmoidectomy	
	Enterectomy and By-pass	
16:20	Ileostomy and colostomy	
16:30	Distillation
